- Participated in LACC pilot program to the Dominican Republic, April through May of 1998. My role was twofold one as a supervising clinician who dictated as well dispensed primary and chiropractic care to the hundreds of Dominican patients. As well as serving as the hospitals and the group's only radiologist during my two-week stay. Our goal on this trip was to introduce the people in the Dominican Republic to chiropractic as well as acting as primary care givers.
- American Chiropractic College of Radiology Workshop-Symposium 1997 at Denver CO.

- Weekly sessions with Stephen Rothman, M.D., neuroradiologist at Peninsula Hospital, San Pedro CA. Studies were focused on computed tomography and magnetic resonance imaging of the spine and brain. Dates of sessions January 1998 to present.
- Weekly observations of radiology readout sessions with Donald Resnick, MD, at San Diego Veterans Administrative Hospital, La Jolla, Ca. Studies were focused on osteoradiology to include plain film and advanced imaging. Dates of session's January 1998- April 1999.
- Weekly observations of spine surgery rounds at University of California Los Angeles County Hospital. Dates of sessions, April 1996 through February 1997.
- Month long rotation in the rheumatology ward at the Veterans Administrative Hospital in Houston TX, under Dr. Lidsky M.D. Duties included participating in patient rounds, and performing initial as well as follow up exams on patients. Dates of rotation August 1995.

PRESENTATIONS

Case presentation on a 39-year-old male with asymptomatic bullas lung disease. Poster presentation at Los Angeles College of Chiropractic research day 1999.

Can ninth term chiropractic interns properly refer patients based solely on radiographic findings? Poster presentation at Los Angeles College of Chiropractic research day 1998. Study was designed to determine if when an intern is presented with radiographs that depicted normal as well as certain pathological conditions on a radiograph would he or she be able to make the proper decision regarding referral.

Radiographic physics, quality control and quality assurance lectures for the Colorado Chiropractic Association, August of 1997. Lecture consisted of basic radiographic physics for Chiropractic assistance who are participating in film acquisition. As well as topics and procedures in quality control to obtain high quality radiographs.

Multiple myeloma case presentation at the American Chiropractic College of Radiology convention, August of 1997. Presented case report on a 86 year old female with plain film, computer tomography and biopsy findings of multiple myeloma.

PROFESSIONAL AWARDS

Kheeler award winner April 1996. Kheeler award is given to the graduating chiropractic intern who has excelled in both academic as well as professional aptitude in his or her graduating class at Texas Chiropractic College. It is the highest honor that can be bestowed on a graduating intern.

NCMIC scholarship award winner 1996. Scholarship was based on student's need as well as students contribution to chiropractic through out his or her tenure at the school.

Academic recognition (Honors), April 1996 graduation at Texas Chiropractic College.
